Software Features

Menu Driven, easy to use **Virtual Instrument Technology** Log, View, Print data in Tabular or **Graphical format Control PC6 Remotely** Automatic production of Calibration Certificate System requirements: 486 with maths coprocessor. Windows 3.1 or higher www.si-pressure.com Tel: 0121 784 6855 (UK) Tel: +44 121 784 6855 (Int)

SI Pressure Instruments Ltd, a leading manufacturer of Pressure Calibrators, **Deadweight Testers and Pressure Generation** Test Equipment has developed calibration software to meet the changing demands of industry and to comply with ISO 9000 Quality systems.

SiCal is a menu driven software based on Virtual Instrument Technology developed by the engineering team at SI with its in depth knowledge and many years experience of pressure calibrator design for many applications in the pressure measurement field.

SiCal will allow users to control the PC6 Calibrator remotely through a virtual instrument panel on the computer screen. The calibration data can be logged, viewed and printed in graphical format or on a calibration certificate.

Certificate of Calibration					
Test Instrumer	nt Details				
Serial No Description Range	: 5972 : PCC3-H-350-3 : 0 to 20 bar		Certificate No Date of Issue Accuracy (%FS)	: 1296035 : 19-Dec-96 : 0.1
