

PanaFlow™ MV80

In-line and Insertion Multivariable
Flowmeters for Mass, Temperature,
and Pressure

Key Benefits

- Multivariable vortex flowmeter with built-in flow computer for measuring volumetric flow, temperature, pressure, density, energy, and mass flow using a single meter
- Measures most gases, liquids and steam without the need to recalibrate
- Advanced design and digital signal processing for vibration isolation
- Cost effective, accurate and reliable meter for volumetric and mass flow measurement
- Energy management through accurate measurement of both temperature and mass flow simultaneously
- Remote monitoring and integration to DCS using HART® and Modbus® communication protocols
- Significant cost savings through reduced installation costs, wiring runs and services support using MV meter with no moving parts

Applications

- Ideal for high temperature and high velocity steam
- Power Generation— fuel and steam applications
- Industrial—HVAC, district energy management
- Commercial—building, campus and facility energy management
- Oil & gas—allocation of natural gas
- Petrochemical—mass balancing, reaction processes heating

GE imagination at work

Unique Multivariable Design

GE Sensing's PanaFlow MV80 In-line Multivariable Mass Vortex flowmeter is the next generation vortex meter. PanaFlow MV80's multivariable design consists of a vortex shedding velocity sensor, an RTD temperature sensor and a solid state pressure transducer that measures the mass flow rate of steam, gases and liquids. Other meter types use external process measurements to calculate mass flow. The temperature and pressure devices are typically not installed in the same location as the flowmeter. Process conditions can vary greatly between the two locations, causing inaccurate mass flow readings. PanaFlow MV80 measures velocity, temperature and pressure at the same location, which provides more accurate process measurement.

Portfolio of Flowmeter Solutions

GE Sensing is committed to providing customers with the best technologies for their flow measurement needs. PanaFlow MV80 is the newest addition to the PanaFlow family of flowmeters, providing effective solutions for smaller pipe sizes for a variety of applications. GE Sensing offers the PanaFlow MV80 in a number of configurations to best suit your application measurement needs.

Field Service Solutions

GE Sensing & Inspection Technologies has a global field service team ready to assist in the start-up and commissioning of the PanaFlow MV80 flowmeters. This service includes validating the proper installation and programming of the meter, and can include customized training for theory, operation and maintenance. Regularly scheduled preventative maintenance visits will provide peace of mind, ensuring that the meters work to specification and your expectation for years.

Mass Flow Measurement—True Multivariable

The MV80 offers flow computer functionality in a compact field device. The VTP option incorporates temperature and pressure sensors to provide an instantaneous reading of compensated mass flow rate of gases, liquids and steam. In addition to outputs for totalized mass and alarm settings, the field configurable electronics deliver up to three analog 4-20 mA outputs of five process measurements, including volumetric flow rate, mass flow rate, pressure, temperature and density. Alternate configurations for mass flow include a temperature only compensation (VT), best used when in saturated steam applications, and an integrated RTD with an external pressure transmitter (VT-EP) when a full function pressure transmitter is desired.

Energy Measurement in Liquids and Steam

The VT-EM energy monitoring option enables real time-of-flight diffraction calculation of energy consumption for a facility or process. The meter can be programmed to measure steam, hot water or chilled water. This option uses the MV80 flowmeter to monitor one side of the process, either sent or return, and uses the input from a second separate temperature sensor on the opposite leg of the process to calculate the change in energy. Selectable energy units include BTU, joules, calories, Watt-hours, Megawatt-hours and Horsepower-hours. The local or remote electronics indicate two temperatures, delta T, mass total and energy total. For energy measurement in steam, the VTP-EM option adds a pressure transmitter to offer better accuracy.

Volumetric Flow for Most Gases and Liquids

The base model MV80 delivers a direct reading of volumetric flow rate—generally the most cost-effective solution for liquid flow monitoring—in applications ranging from general water flows to hydrocarbon fuel flow measurement.

Model	Configuration	Volumetric	Mass Flow	Integrated RTD	Integrated Pressure	External Temperature	External Pressure	Typical Application
MV80-V	Volumetric for liquid, gas and steam	X						Liquids
MV80-VT	Mass flow with Temperature and assumed saturated steam	X	X	X				Saturated Steam Liquid Mass
MV80-VTP	Mass flow with integrated Temperature and Pressure in one device	X	X	X	X			Steam and Gases
MV80-VT-EP	Mass flow with integrated Temperature and analog input for an external pressure transmitter	X	X	X			X	Steam and Gases
MV80-VT-EM	Energy using integrated Temperature and one input for an RTD Transmitter	X		X		X		Liquid Energy
MV80-VTP-EM	Energy for steam with integrated pressure and temperature and one input for an RTD transmitter.	X	X	X	X	X		Steam Energy

PanaFlow MV80 Specifications

Performance

Accuracy

Mass flow rate accuracy for gas and steam based on 50-100% of pressure range

PanaFlow MV80 Accuracy Flowmeter		
Process Variable	Liquids	Gas and Steam
Volumetric Flow Rate	± .7% of Rate	± 1% of Rate
Mass Flow Rate	± 1% of Rate	± 1.5% of Rate
Temperature	± 2°F (± 1°C)	± 2°F (± 1°C)
Pressure	± .3% of Full Scale	± .3% of Full Scale
Density	± .3% of Reading	± .5% of Reading

Repeatability

Mass Flow Rate	±0.2% of rate
Volumetric Flow Rate	±0.1% of rate
Temperature	±0.2°F (± 0.1°C)
Pressure	±0.05% of full scale
Density	±0.1% of reading

Stability Over 12 Months

Mass Flow Rate	±0.2% of rate
Volumetric Flow Rate	negligible
Temperature	±0.9°F (± 0.5°C)
Pressure	±0.1% of full scale
Density	±0.1% of reading

Response Time

Adjustable from 1 to 100 seconds

Operating

Process and Ambient Temperature

Process Standard Temperature (code ST):	-40 to 500°F (-40 to 260°C)
Process High Temperature (code HT):	Up to 750°F (400°C)
Ambient Operating:	-5 to 185°F (-20 to 85°C)
Ambient Storage:	-40 to 185°F (-40 to 85°C)

Pressure Transducer Ratings			
Full Scale Operating Pressure		Max. Over-Range Pressure	
psia	bara	psia	bara
30	2	60	4
100	7	200	14
300	20	600	40
500	35	1000	70
1500	100	2500	175

Power Requirements

Model MV80-V: 12-36 VDC loop powered
 Model MV80-VTP, DC option: 12-36 VDC, 100 mA max
 Model MV80-VTP, AC option: 85-240 VAC, 50/60 Hz, 1 Watt

Display

Alphanumeric 2 line x 16 character LCD digital display
 Six pushbuttons for full field configuration
 Pushbuttons can be operated with magnetic wand without removal of enclosure covers
 Display can be mounted in 90° intervals for better viewing

Output Signals

Analogue: 4-20 mA, loop powered for volumetric meters
 Alarm: Solid state relay, 40 VDC
 Totalizer Pulse: 50 millisecond, 40 VDC
 Volumetric: One analog, one totalizer pulse, HART
 Multivariable: Up to three analog signals, three alarms, one totalizer pulse, HART
 Multivariable option: Modbus process monitoring

Physical

Wetted Materials

316L stainless steel, plus:

- PTFE-based thread sealant on models with pressure transducer
- PTFE packing on standard temperature models with packing gland
- Graphite-based packing on high temperature models with packing gland

Certifications

Explosion-proof for Class I, Division 1, Groups B, C & D
 Dust-ignitionproof for Class II, III, Division 1, Groups E, F & G
 Type 4x and IP66
 T6 Temperature Class at -40°C - +70°C
 KEMA ATEX/IEC Ex Approvals II 2G Ex d IIB + H2 T6
 II 2 D Ex tD A21 IP66 T85°C

Sizing Considerations

Piping Conditions	Pipe Diameters, D	
	Upstream	Downstream
One 90° elbow before meter	10D	5D
Two 90° elbows before meter	15D	5D
Two 90° elbows before meter, out of plane	25D	5D
Reduction before meter	10D	5D
Expansion before meter	20D	5D
Partially open valve	25D	5D

Turndown

Turndown is application-dependent. Consult the PanaFlow MV Sizing Program for exact values. Turndown can exceed 100:1.

PanaFlow MV80 Ordering Information

Parent Number Code

MV80 In-line Multivariable Mass
Vortex Flowmeter

Feature 1: Multivariable Options

- V** Volumetric flowmeter for liquid, gas and steam
- VT** Velocity and temperature sensors
- VTP** Velocity, temperature and pressure sensors
- VT-EM** Energy output options
- VTP-EM** Energy options with pressure sensor
- VT-EP** Velocity and temperature sensors with analog input for pressure.

Feature 2: Flow Body

- 04** 1/2-inch Nominal Bore (15 mm)
- 06** 3/4-inch Nominal Bore (20 mm)
- 08** 1-inch Nominal Bore (25 mm)
- 12** 1.5-inch Nominal Bore (40 mm)
- 16** 2-inch Nominal Bore (50 mm)
- 24** 3-inch Nominal Bore (80 mm)
- 32** 4-inch Nominal Bore (100 mm)
- 48** 6-inch Nominal Bore (150 mm)
- 64** 8-inch Nominal Bore (200 mm)

Feature 3: Meter Body Material

- C** Carbon Steel
- S** 316 Stainless Steel
- H** Hastelloy

Feature 4: Process Connection

- 150** ANSI 150# Flange
- 300** ANSI 300# Flange
- 600** ANSI 600# Flange
- W** Wafer ANSI 600#
- 16** PN 16
- 40** PN 40
- 64** PN 64

Feature 5: Electronics Enclosure

- L** Type 4X Enclosure
- R (25)** Remote electronics Type 4X, 25 ft (8 m) cable
- R (50)** Remote electronics Type 4X, 50 ft (8 m) cable

Feature 6: Display Options

- DD** Digital Display and Programming Buttons
- ND** No Display

Feature 7: Input Power

- DC2** 12 to 36 VDC required on 2-wire (loop powered) meters with 1AHL only
- DC4** 12 to 36 VDC standard volumetric meter on 4-wire
- AC** 100-240 VAC, 50/60 Hz

Feature 8: Output

- 1AHL** Loop powered option—one analog output (4 to 20 mA), one pulse, HART communication protocol. Must use DC2 input power
- 1AM** One analog output (4-20 mA), one alarm, one pulse, MODBUS Communication Protocol
- 3AH** Three analog outputs (4-20 mA), three alarms, one pulse, HART (VT,VTP only)
- 3AM** Three analog outputs (4-20 mA), three alarms, one pulse, MODBUS (VT,VTP only)

Feature 9: Process Temperature Options

- ST** Standard process temperature -40° to 500°F (-40° to 260°C)
- HT** High process temperature 750°F (400°C)

Feature 10: Process Pressure

- P0** No Pressure Sensor
- P1** Maximum 30 psia (2 bara), Proof 60 psia (4 bara)
- P2** Maximum 100 psia (7 bara), Proof 200 psia (14 bara)
- P3** Maximum 300 psia (20 bara), Proof 600 psia (41 bara)
- P4** Maximum 500 psia (34 bara), Proof 1000 psia (64 bara)
- P5** Maximum 1500 psia (100 bara), Proof 2500 psia (175 bara)
